

## Supporting The Carer with End Of Life Care

This study day is suitable for all healthcare professionals involved in supporting care of the dying person. The workshop will explore supporting the carer before, during and after the terminal phase of life.

Sessions will be interactive and informative. Topics include:

- Advance Care Planning
- Anticipating and addressing patient and carer needs
- Identifying deterioration & support for decision-making
- Communication skills
- Case discussions
- Grief and Bereavement support.
